About measures to further improve the system of household waste management

Decision of the President of the Republic of Uzbekistan

The country has a consistent policy in the field of environmental protection, rational use of natural resources, and improvement of the sanitary and environmental situation of the regions.

Particularly, in the short term it is necessary to improve the infrastructure of solid waste management system, to create clusters for complex waste management with total capacity of processing more than one million tons of household waste per year. Extensive work was done. The measures allowed to increase the coverage of the population with sanitary services more than ten times.

At the same time, there are some systemic obstacles to the creation of favorable conditions for the provision of environmental safety, as well as proper sanitation of the settlements, in particular:

Firstly, public-private partnerships in the area of household waste management are insufficient, leading to poor infrastructure and inadequate coverage of residential areas;

Secondly, the situation with the use of secondary material resources, as well as the system of household waste, does not meet modern requirements, which leads to the inefficient use of natural resources;

thirdly, polymer film materials that cause contamination of the settlements are used excessive and distributed, and there is no system for the use of alternative biodegradable materials;

Fourth, an ineffective system for responding to and responding to environmental offenses that result in unlawful acts committed, including non-liability for environmental pollution;

Fifth, there is no modern innovative information and communication technology to assess the actual sanitary and ecological condition of the country.

In order to further develop the system of household waste management, improve the provision of the population with quality sanitation services, as well as to use the existing opportunities to solve environmental problems:

1. Decree of the President of the Republic of Uzbekistan dated April 21, 2017 N PP-2916 to the State Committee of the Republic of Uzbekistan for Ecology and Environmental Protection (hereinafter referred to as the State Committee for Ecology) to envisage further expansion of participation in waste collection, transportation, utilization, processing, burial and sale.

2. Approve the proposal of the State Ecology Committee to involve business entities on public-private partnerships in the provision of waste collection and disposal services by creating favorable conditions for investment in this area.

3. To establish that from August 1, 2018:

Provision of proper cleanliness of waste collection points on the basis of public-private partnership to district and city territories (hereinafter - territories) to carry out activities on collection and disposal of household waste, as well as independent sorting of household waste attached to the condition;

Assignment of territories to business entities through public-private partnerships to provide domestic waste collection and disposal services is available only on a competitive basis through a single e-commerce platform E-IJRO AUKSION;

Individual waste collection and disposal services are provided by public contracts.

To establish:

In the event that a tender for the provision of waste collection and disposal services to the business entities is not held, the respective territories shall be assigned to the "Clean Zone" or "Mahsustrans" without competition;

The State Committee for Ecology coordinates activities to implement investment projects aimed at attracting investments into the household waste management business.

4. Prosecutor General's Office of the Republic of Uzbekistan and State Committee for Ecology
The Council of Ministers of the Republic of Karakalpakstan, regions

and in cooperation with khokimiyats of Tashkent city and other interested ministries and departments within two months:

areas for waste collection and disposal services

development and implementation of an automated information system for collecting materials for business entities and implementing consensus procedures with the competent authorities, as well as integrating it into a single e-commerce platform "E-IJRO AUKSION";

provision of services for the collection and removal of household waste to the business entities by means of electronic auction through the single e-commerce platform "E-IJRO AUKSION".

5. Starting from January 1, 2019, the following will be prohibited:

free delivery of polymer film bundles, including the cost of goods sold in the territory of the Republic of Uzbekistan, as well as their sale at a lower cost (excluding packages that are integral parts and goods);

Production of polymer film packages less than 40 microns in the territory of the Republic of Uzbekistan (packages made of polymer film for export, no handles and integral part of goods, sold for commercial

rolls, as well as bio-filtered polymeric materials except);

Packages of polymer film on the territory of the Republic of Uzbekistan

(TIF TN 3923 21 000 0, 3923 29 100 0, 3923 29 000) packages imported by physical persons for transportation and packing of goods and personal belongings, as well as in transit except for the goods being transported.

The State Committee for Environment Protection, the State Tax Committee of the Republic of Uzbekistan and the State Customs Committee should ensure strict compliance with the requirements specified in this clause.

6. The State Ecology Committee, together with the concerned ministries and departments, will produce and import environmental hazards after the loss of use by January 1, 2020, taking into account foreign experience and comprehensive public discussion. to make proposals to the commodity group on the expediency of introducing environmental fees.

7. By January 1, 2023:

to the Republican Road Fund under the Cabinet of Ministers of the Republic of Uzbekistan for the registration of new domestic vehicles purchased by organizations operating in the field of household waste management. 'levies;

SUE Clean Territory and State Unitary Enterprise "Mahsustrans"

the purposeful deduction of funds from obligatory payments (excluding single social payments) with the purpose of strengthening their material and technical base;

Customs equipment, spare parts and components, raw materials and materials imported on the basis of established lists for use in the technological process of production of biodegradable polymeric materials for packaging and packaging of goods not produced in the Republic donations (except for customs clearance fees);
