West Grand Terre Beach Nourishment and Stabilization

Project ID: 245 | Project Status: Monitoring/O&M

Description:
The project is located in Jefferson Parish immediately northeast of Grand Isle and extends to Pass Abel.

The project restored approximately 295 (original estimate 371) acres of beach and dune and approximately 144 (original estimate 160) acres of intertidal marsh habitat. These improvements include approximately 14,000 linear feet of shoreline along West Grand Terre Island. Additionally, the project includes approximately 5,160 feet in length on the bay side of the island and 600 feet of rock breakwater on the ocean side.

This project was funded for Engineering and Design (E&D) through the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revitalization of the Gulf Coast States Act (RESTORE) and was then selected for implementation in the Louisiana Trustees' Implementation Plan/Environmental Assessment #6 in April 2020.

Recent Update:
In 2023, vegetative plantings were installed and aerial imagery was acquired.
